SYSTEM FOR FOLDING SHUTTERS

## WIN-FOLD 2 – mount your shutters flush with your façades for a beautiful look!

Optimise your spaces and make life easier!  
Endlessly innovative high quality sliding systems.

### European specialist in roller accessories and rails for doors and handling systems.

The **MANTION** company founded by Mr Alexandre Manton in 1920 made different art items in metal. It quickly developed to specialise in accessories for sliding doors. The market in those days was essentially a rural one and it is fair to say that virtually all agricultural buildings in France are equipped with door fittings made by **MANTION**.

Since 1920, **MANTION** has been designing, manufacturing and selling sliding systems developed for two distinct sectors: construction, with sliding fittings for doors, and industry, with handling systems using overhead monorails.

In line with its demanding quality policy, all **MANTION** sliding systems undergo rigorous testing to ensure they systematically meet the most stringent international standards. And with its catalogues of special products and constant new developments, **MANTION** will always have a ready-made or customised solution to offer you.

**MANTION** markets all its products under the internationally known **SPORTUB**, **HERCULE** and **MINISPORT** brand names.

Every year the **MANTION** group invests about 4% of its turnover in innovation, backing up that investment with a very active policy of registering international patents.

#### + OPTIONS

The system can be enhanced with a mechanism for holding the shutters open and 1 or 2-point locking.

#### + FOR SIMPLY BEAUTIFUL FAÇADES

The track is concealed behind the leaves, providing continuity between adjacent shutters on the same floor, as well as between shutters on different floors. The WIN-FOLD 2 system can be mounted flush with the façade.
